

Commoner Co-Star Lee
For Lee G2M
by Don Albert

1. Figures were posed barefooted. Adjustments may be required when adding footwear.

2. Hands are set to accommodate a variety of props. The specific props shown in the promo images are not required.

3. A shoulder carry pole is included as a smart prop, ready to receive hanging cargo. The tool Pole is included to help position actual hand-held shovel/hoe/rake type props.

Apply the “Hand Pole Loader” figure pose. Load the smart-prop tool pole and then a long-handled tool prop. Merge the actual tool with the pole. The loader pose figure holds the pole at a horizontal for easy merging of the two props.

Make the pole the Parent of the tool. Then re-parent the positioned tool to either hand. Delete the pole or make it invisible. Apply the raking/shoveling/hoeing pose.

4. Partial lower body poses are included for adding variations. Upper body torsos may require side-to-side or bending adjustments.
