

Smoking Props Scripts Quick Guide

Smoke Randomizer

The Smoke Randomizer script will randomly set the transparency maps for the Smoke Prop smoke planes.

Usage

Select one or more Smoke props, and activate the script.

All Smoke faces Camera

The All Smoke faces Camera script will rotate all Smoke props in the current scene so they will face the current camera as much as possible by rotating the props along the Y-axis. It will not tilt the smokes (as smoke goes up, not sideways) along neither the X, nor the Z-axis.

Usage

Launch the script when you have at least one smoke prop in the scene.
